■ GOREND HBS Overview

GoRend HBS is a factory batched, through coloured monocouche render, specifically designed and formulated for new build properties. GoRend HBS is quick and easy to apply in one coat over new blockwork. GoRend HBS has an attractive and durable 2mm scraped aggregate finish.

■ Features & Benefits

- 12 Colours - next working day delivery available on stock colours
- Fast Application
- 5-36 hours scrape time depending on weather conditions
- Suitable for machine and hand application
- Through coloured - low maintenance decorative finish
- Can be directly applied to standard 7kN concrete block which is cost effective and speeds up application
- High tensile and compressive strength - gives long term durability
- Vapour permeable - allows walls to breath, providing a healthy living environment

■ Application

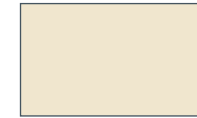

GoRend HBS is mixed with clean water and applied to new blockwork in 2 passes, "wet on wet". ProMesh grade 5 is embedded in to the first pass and around all apertures and stress points (fully meshed on lightweight block).

GoRend HBS is then ruled off, flattened and left to cure. Once the GoRend HBS has had sufficient time to dry (5-36 hours depending on weather conditions) GoRend HBS is scraped back with a nail float, any loose scrapings are brushed off and then left to fully cure.
